

Table of Contents

Preface

Acknowledgments

Introduction

Part One: Current Reality

1 Human Nature and the Evolutionary Process

 In The Beginning

 Learned Behavior

 Cellular Memory

2 The Competitive Learning System

 Premature Competition

 Positive Effects of a Competitive System

 Drawbacks of the Competitive System

 What Lessons Are We Teaching

Part Two: Beyond Competition

3 Birth of a Non-competitive Model

 Playing in the Zone

 The Beginnings of Effortless Learning

 The Importance of Cellular Memory in the Learning Process

4 Advantages of Non-competitive Learning

 The Phases of Learning and Mastery

 Possible Drawbacks of Non-Competitive Learning

 The Bottom Line — For “Competitive” People

 The Future of Sports

Part Three: Effortless Learning

5 Fundamentals of Learning

 Core Information

 The Sequential Nature of Learning

 Conscious/Subconscious Learning

 Slow-Motion Learning

 The Principle of “Less Than Optimal”

 Everything We Know Is Wrong

 Learning Plateaus

 Mental-Lightness Training

6 Keys to Peak Performance

 Joy

 Relaxation

 Concentration

 Patience

Perseverance
Self-Motivation
Accountability
Fitness
Coordination
Efficient Skill Development
Playing in the Zone of Life

Part Four: The Next Step in Human Evolution

7 Toward a More Cooperative Worldview

Competition, Cooperation, Reciprocation

Evolving Views

The Last Bastion

Getting Unstuck from the Past

8 Actualizing Our Potential

The Hierarchy of Needs

Enlightened Self-Interest

And in the End . . .

Everyone Has a Piece of the Puzzle

Works Consulted

Recommended Resources
